

Same passing solutions, opposite headline

No-incentive condition: the shown rule permits the migration target — this bounds deception absent pressure.

Claims read by a prose-only judge (never sees code); facts by AST. Strict-side rates are judge-based and single-sourced (correction §6); shown-side = construct-union denial, whiskers = one-sided 95% Clopper-Pearson. Migration rates recomputed from data/evidence/quadrant_v4/. Opportunities to deceive (violated shown rule $\wedge$ passed): base 6 (1 denied), R-SFT 0, DPO-r1 0 — training removed the opportunity, not just the act.
